HHS Releases Findings

Report of Teen Pregnancy Prevention Programs

$375 million dollars & 5 years of Teen Pregnancy Prevention (TPP) programs show that the purported "Evidenced-Based" programs aren't showing much evidence of effectiveness.

Nearly a $Billion

More than $700 million taxpayer dollars was spent on the Teen Pregnancy Prevention Program since 2010.

Is This Money Well Spent?

$75 million

Annually spent to replicate programs that often normalize teen sex.

$375 million

Taxpayer dollars spent on replicating so-called "Evidenced-based" programs over 5 years.

>90%

More than 90% of all federal sex education funding goes to this approach.

80%

More than 80% of students in these programs fared either worse or no better than their peers who were not in the program.

100%

HHS Promises: "Evidence-based programs can be expected to produce positive results consistently." – HHS 2/2015

...most of the programs had small or insignificant impacts on adolescent behavior" – Am. Journal of Pub. Health, 9/2016

Newly released research gauged the effectiveness of the Teen Pregnancy Prevention Program from 2010-2014. In some cases, students were more likely to engage in risky behavior as a result of their participation in the program.

Findings: 3 Organizations Funded With Teen Pregnancy Prevention Grants Increased Youth Risk
